5. Product Description

This product is a recombinant Human TGFBR2 partial protein (23-166aa) expressed in E.coli. The protein is dual-tagged with 10xHis tag at the N-terminus and Myc tag at the C-terminus, which facilitates protein purification, detection and identification. TGFBR2, also known as AAT3 or FAA3 or LDS2, is suitable for related in vitro functional assays, protein interaction studies, antibody preparation and other biomedical research applications.
