

Recombinant Yeast ALS3 Protein Product Manual

1. Product Basic Information

Product No.: REP06124

Protein Name: Amyotrophic Lateral Sclerosis 3 (Autosomal Dominant (ALS3)

Aliases: amyotrophic lateral sclerosis 3 (autosomal dominant

UniProt ID: Q59L12

UniProt Link: <https://www.uniprot.org/uniprotkb/Q59L12/entry>

Species Source: Candida albicans (Yeast)

Expression System: E.coli

Protein Length: Partial (918-1119aa)

Molecular Weight: 37.9kDa

Protein Tag: N-terminal 10xHis-B2M-tagged and C-terminal Myc-tagged

2. Amino Acid Sequence (918-1119aa)

3. Storage Buffer

Liquid Delivery Form: Tris/PBS-based buffer with 5%-50% glycerol. Custom glycerol content is available upon customer request (please specify requirements when placing orders).

Lyophilized Powder Delivery Form: Pre-lyophilization buffer is Tris/PBS-based buffer containing 6% Trehalose.

4. Storage Conditions

Upon receipt, store the product at -20°C or -80°C. It is recommended to aliquot the protein for multiple uses to avoid repeated freeze-thaw cycles, which may cause protein denaturation and activity loss.

5. Product Description

This product is a recombinant Yeast ALS3 partial protein (918-1119aa) expressed in E.coli. The protein is dual-tagged with 10xHis-B2M tag at the N-terminus and Myc tag at the C-terminus, which facilitates protein purification, detection and identification. ALS3, also known as amyotrophic lateral sclerosis 3 (autosomal dominant, is suitable for related in vitro functional assays, protein interaction studies, antibody preparation and other biomedical research applications.

6. Notes

- Repeated freezing and thawing of the product is strictly prohibited to ensure protein stability and biological activity.
- For special buffer component requirements, please submit a note when purchasing.
- This product is only for scientific research use, not for clinical diagnosis, treatment or commercial production purposes.
