Upon receipt, store the product at -20°C or -80°C. It is recommended to aliquot the protein for multiple uses to avoid repeated freeze-thaw cycles, which may cause protein denaturation and activity loss.

5. Product Description

This product is a recombinant Human BAGE2 full length of mature protein protein (18-109aa) expressed in E.coli. The protein is dual-tagged with 10xHis tag at the N-terminus and Myc tag at the C-terminus, which facilitates protein purification, detection and identification. BAGE2, also known as BAGE family member 2 (pseudogene, is suitable for related in vitro functional assays, protein interaction studies, antibody preparation and other biomedical research applications.
