protein for multiple uses to avoid repeated freeze-thaw cycles, which may cause protein denaturation and activity loss.

5. Product Description

This product is a recombinant Human GPC1 partial protein (342-530aa) expressed in E.coli. The protein is dual-tagged with 10xHis-GST tag at the N-terminus and Myc tag at the C-terminus, which facilitates protein purification, detection and identification. GPC1, also known as glypican glypican-glypican proteoglycan epididymis secretory sperm binding protein, is suitable for related in vitro functional assays, protein interaction studies, antibody preparation and other biomedical research applications.

6. Notes

- Repeated freezing and thawing of the product is strictly prohibited to ensure protein stability and biological activity.
- For special buffer component requirements, please submit a note when purchasing.
- This product is only for scientific research use, not for clinical diagnosis, treatment or commercial production purposes.
