

Recombinant Mouse HAX1 Protein

For Research Use Only

1. Basic Product Information

Catalog No.: REP51152

Size: 10ug, 100ug

Protein Name: HCLS1-associated protein X-1 (HS1-associating protein X-1) (HAX-1) (HS1-binding protein 1) (HSP1BP-1)

Synonym: Hax1, Hs1bp1

UniProt ID: O35387

UniProt Link: www.uniprot.org/uniprotkb/O35387/entry

Species Source: Mouse

Expression System: HEK293T eukaryotic cell expression system Sequence

Length: 280 AA

Molecular Weight: 32 KD

Protein Tag: C-terminal His6

2. Amino Acid Sequence

3. Buffer Composition

Liquid format: PBS-based buffer containing 50% glycerol. Glycerol concentration can be customized upon customer request; please state special requirements when placing your order.

Lyophilized format: Buffer before lyophilization is PBS supplemented with 6% trehalose.

4. Storage Conditions

Upon receipt, store the product at -20 °C or -80 °C. Aliquot the product for on-demand use to preserve protein activity and prevent denaturation and inactivation caused by repeated freeze-thaw cycles.

5. Product Description

This product is recombinant HCLS1-associated protein X-1 (HS1-associating protein X-1) (HAX-1) (HS1-binding protein 1) (HSP1BP-1) produced using the HEK293T eukaryotic cell expression system. It is suitable for in-vitro functional assays, protein-protein interaction studies, antibody preparation and other biomedical research applications.

Protein Function: Recruits the Arp2/3 complex to the cell cortex and regulates reorganization of the cortical actin cytoskeleton via its interaction with KCNC3 and the Arp2/3 complex. Slows down the rate of inactivation of KCNC3 channels. Promotes GNA13-mediated cell migration. Involved in the clathrin-mediated endocytosis pathway. May be involved in internalization of ABC transporters such as ABCB11. May inhibit CASP9 and CASP3. Promotes cell survival. May regulate intracellular calcium pools.

Subcellular Localization: Mitochondrion matrix . Endoplasmic reticulum . Nucleus membrane . Cytoplasmic vesicle . Cytoplasm, cell cortex . Cell membrane ; Peripheral membrane protein ; Cytoplasmic side . Sarcoplasmic reticulum . Cytoplasm, P-body . Cytoplasm . Nucleus .
Note=Predominantly cytoplasmic. Also detected in the nucleus when nuclear export is inhibited (in vitro).

6. Notes

- Avoid repeated freeze-thaw cycles to maintain protein stability and biological activity.
- Please specify special buffer-composition requirements at the time of order placement.
- For research use only. Not intended for clinical diagnosis, therapeutic use or commercial manufacturing.
