5. Product Description

This product is recombinant PTB-containing, cubilin and LRP1-interacting protein (P-CL11) (Phosphotyrosine interaction domain-containing protein 1) produced using the HEK293T eukaryotic cell expression system. It is suitable for in-vitro functional assays, protein-protein interaction studies, antibody preparation and other biomedical research applications.

Protein Function: Increases proliferation of preadipocytes without affecting adipocytic differentiation.

Subcellular Localization: Cytoplasm .

6. Notes

- Avoid repeated freeze-thaw cycles to maintain protein stability and biological activity.
- Please specify special buffer-composition requirements at the time of order placement.
- For research use only. Not intended for clinical diagnosis, therapeutic use or commercial manufacturing.
