5. Product Description

This product is recombinant C-C motif chemokine 1 (Small-inducible cytokine A1) (T lymphocyte-secreted protein I-309) produced using the HEK293T eukaryotic cell expression system. It is suitable for in-vitro functional assays, protein-protein interaction studies, antibody preparation and other biomedical research applications.

Protein Function: Cytokine that is chemotactic for monocytes but not for neutrophils. Binds to CCR8.

Subcellular Localization: Secreted.

6. Notes

- Avoid repeated freeze-thaw cycles to maintain protein stability and biological activity.
- Please specify special buffer-composition requirements at the time of order placement.
- For research use only. Not intended for clinical diagnosis, therapeutic use or commercial manufacturing.
